## PERSONAL PROJECTS

### Weather App

- **Technologies:** Express.js, Handlebars (HBS), Third-Party Weather API.
- **Features:** Real-time weather data, city-based search, dynamic page rendering.
- **Responsibilities:** Integrated weather API, implemented server-side rendering, designed responsive UI.
- **Outcome:** Delivered a responsive weather app with real-time updates and a user-friendly interface.

### In-house Authentication

- **Technologies:** Node.js, Express.js, Handlebars (HBS), bcryptjs, jsonwebtoken, Validator, dotenv, Mongoose.
- **Features:** User registration and login, protected pages accessible only to logged-in users.
- **Responsibilities:** Implemented authentication using bcryptjs for password hashing, jsonwebtoken for session management, and Mongoose for database interactions.
- **Outcome:** Developed a secure authentication system ensuring protected access to sensitive pages and user data integrity.
